

Beyond Sensory Experience - The dull routine of existence (cd Cold Meat Industry) The new cd of this Swedish duo leads us through an enigmatic whirlwind. The ambient side of BSE has been characterized by an impressive wealth of diversity. They now compose pure ambient soundscapes full of dark elements and spooky vocals lost in forgotten realms of despair and then add some percussion parts. They incorporated a lot of sounds and noise sources moving spoken samplings, cracking sounds reminding to old vinyl, experimental sound sculptures and even free-classical interpretations. My favorite cuts are "Closed" for the mysterious feeling, "The dull routine of existence" for the percussion side and "Kverulant" for the experimental-neo-classical side and the percussion as well! One more must have on CMI! (DP:7/8)DP.
